---

DO not accept any substitutes offered for **"Standard"** Porcelain Enameled Ware.

Every piece of **"Standard"** Ware bears one of our **"GREEN and GOLD"** guarantee labels and has our trade mark **"Standard"** cast on the exterior. No others are genuine. See page 67 of this booklet for exact reproductions of our label.

If our **"GREEN and GOLD"** label is not on the fixture, it is positively not **"Standard"** Ware and you should not accept it at any price. The quality is not there and it will cost you more in the end.

When ordering specify that every fixture must bear the **"Standard"** label. Its presence is the assurance that you are buying the very best fixtures made, at no more than the cost of inferior goods.

## INTRODUCTORY

 IN the preparation of this book it has been our aim to compile such information as will be of value to the home-builder in matters pertaining to the Bath Room and Plumbing generally. We have endeavored to make it of such interest that the book will be preserved for future reference.

In the following pages a few suggestions as to the interior arrangement of Modern Bath Rooms have been given. These are not the imaginary sketches of artists, but reproduced direct from photographs of our goods.

**"Standard"** Baths and Plumbing Goods need no introduction to the American people, nor, for that matter, to the entire world. Their great and constantly increasing use in every country on the globe proclaims them to be of the highest quality that skillful workmanship and best material can produce.

Design, finish, durability unsurpassed.

## HEALTH, CLEANLINESS, HAPPINESS

**T**HESE conditions may as readily be obtained by bathing in a porcelain enameled tub as by indulging in the popular pastime of surf bathing as depicted by our artist.

You will so much enjoy using, in your own home, a pure white inviting bath tub with an overhead shower, that the pleasure you derive from ocean bathing will be relegated to a secondary position in your list of enjoyments.

## HARMONIOUS DECORATIVE EFFECTS

HARMONIOUS decorations produce artistic effect. As a finishing touch to your bath room, permit us to decorate the tub to harmonize with the environment. Our facilities along these lines are unequalled. We accomplish the work much more satisfactorily, and at less cost to you, than if done by your painter, who cannot properly prepare the exterior of the tub to insure the final finish and result. Every bath tub decorated by us receives from eight to fourteen coats of best enamel paint on the exterior, each coat being baked on in a drying oven at 120 degrees temperature, and is then rubbed down with pumice or rotten stone before the succeeding coats are applied. This gives a finish that your painter cannot produce. Decide upon the style of decoration desired, and have your plumber order us to execute it for you. He will show you sample designs, but if you desire to match the tiling of the room, have him furnish us with a sample tile, and we will follow a harmony of treatment. If in doubt, confine the decorative treatment to three narrow gold lines placed near the top of the tub. This is simple, dignified, and appropriate to any surroundings. Whatever your decision, we have a corps of skilled artists competent to execute your wishes. Write us for any further information you may desire.

OUR prices are moderate, no higher than you would pay your own painter to put on the same number of coats without the baking and hand rubbing; besides, baths decorated by our process will wear better and be more satisfactory in every respect.

## THE CARE OF A MODERN BATH ROOM

Do not use any gritty polishing or scouring preparations in cleaning the fixtures ; the frequent use of soap and warm water should be sufficient.

Should this not have the desired effect, however, try a weak solution of ammonia, not over a spoonful to a quart of warm water, or a cloth moistened with refined kerosene or carbon oil.

We can recommend a preparation known as Porcella, which is manufactured especially for cleaning porcelain enameled ware. Ask your plumber or druggist for it.

Use whiting for polishing nickel work. It is just as effective, if frequently applied, as harmful acid preparations which soon destroy the nickel.

Give the same careful attention to the bath room that you would bestow on the best room in the house. Treat your bath tub as you would your fine china or porcelain ware.

There is no part of your house that will give you the same amount of satisfaction and pleasure for the care devoted to it as your bath room.

## VALUE OF SANITARY HIGH GRADE PLUMBING

OOD plumbing is one of the most important features about a house, and should receive careful attention at the hands of the owner at the time the architect is making the plans and specifications.

It does not pay to install cheap plumbing, because there is no one feature in the construction of a house that will be as unsatisfactory—both as to the fixtures and the workmanship. On the other hand, there is nothing which will appeal so strongly to the fastidious and careful housewife, and be so great a source of enjoyment, as modern high grade plumbing.

Many families pay out yearly for doctor bills, for sickness caused by deadly sewer gases due to poor plumbing, more than the difference between the cost of the cheapest and the best work.

You cannot have too many safeguards for the health of your family and yourself.

## ADVICE TO PROSPECTIVE BUILDERS

Choose only well designed and approved styles, and select furnishings in harmony with your building.

Accept good work and reliable service only.

Imitations are shams at best; have none of them. If necessary to reduce cost, build smaller and use fewer fixtures, rather than cheaper ones.

Read your specifications carefully and study your plans frequently.

Cheap goods give poor service and are more expensive in the end.

Good taste should not be sacrificed to economy.

DEFECTIVE plumbing permits the entrance of sewer gas into the house, bearing germs of contagious diseases to which the human system readily succumbs.

It should be remembered that sewer gas is not necessarily generated in the sewer, but that it is quite as frequently created in the plumbing system within the house itself. This is invariably the case if there are any obstructions or uneven surfaces in the pipes where filth may collect.

Not only must the gas from the sewer be prevented from entering the house, but that from the waste pipes within must be thoroughly excluded from the apartments and its egress provided for.

If your plumber has not done a perfect piece of work, or if the plumbing has become deranged, your dwelling is contaminated with sewer gases and you are at the mercy of the germs which this foul air carries.

The most dangerous and deadly sewer gases are often inodorous.

# T H E A R C H I T E C T

An architect should be employed for all building operations, no matter how small. Their services are not expensive.

Let your architect do all detail work. He can make it harmonize with the general plan of your house better than you can.

It is the small details, carefully thought out, which make the complete and artistic home.

Thank the architect if he saves you money. The chances are, nine times out of ten, he will if you do not hamper him.

## BATH CARTS ABOARD

**I**N the last century, and even nowadays in the older parts of many of the cities of France, Spain and other countries of Europe, the houses contain no bath room, and in some instances not even an ordinary water supply. The occupants desirous of bathing, are therefore still obliged to visit public bathing establishments or avail themselves of the services of the "Bath Cart Man."

A familiar sight on the streets is the bath cart, containing common steel tubs, and tanks of hot and cold water. The cart is not always drawn by a horse, but sometimes pulled by the man himself.

On request these portable baths are delivered, and in cases where there is no water supply in the house, the tub is filled from the tanks on the cart. The tenant specifies the hour at which the bath cart man may return for his tubs, and the cost of the accommodation ranges from fifteen to seventy-five cents per bath, according to the distance, the time consumed in making the trip, and whether or not water is included in the service.

The Standard Sanitary Manufacturing Co. exports to the continent of Europe, as well as to all other countries of the world, thousands of porcelain enameled bath tubs yearly. These beautiful modern baths, attractive in design and finish, have completely displaced the antiquated bath wagon and wooden and steel tubs.

Price as described	\$32.25	\$32.25	\$35.25	\$39.00	\$43.50

If with No. 1 Zinc or Ivory White Exterior Finish, without Border, add \$13.00

## "Standard" PORTABLE SHOWER BATH

### A REFRESHING SHOWER AND ITS ADVANTAGES

THE shower or rain bath has long been recognized as one of the most pleasant and exhilarating adjuncts of the bath room, and many eminent physicians and sanitarians pronounce its use most beneficial, claiming that it has an invigorating effect on the system unknown to the tub bath alone; that the effect of falling water given by the shower stimulates the surface circulation and produces a healthy glow that is not only refreshing, but counteracts the enervating effect produced by the tub bath; this is a feature highly appreciated by women.

It affords a splendid means for rinsing the body and closing the pores of the skin, giving the bather a delicious sense of cleanliness and renewed vitality.

Thousands of purchasers of "Standard" PORTABLE SHOWERS have become shower bath enthusiasts, many of whom,

living in rented houses, or apartments, have heretofore refrained from installing expensive permanent fixtures.

## **"Standard"** PORTABLE SHOWER BATH

This shower will last a lifetime; is high grade in every respect and gives as good results as the more expensive permanent fixtures.

The curtain is of best soft, white rubber, or white duck, and folds back in small space when not in use.

The frame is of seamless brass tubing, nickel-plated, substantially made and well braced.

No difficulty will be experienced in placing them in position, a couple of nails or screws driven into the wall over the tub at the height desired being all that is necessary.

The rubber supply tube is made with patented "holdfast," allowing the shower to be readily attached to any regular bath tub faucet.

Write for illustrated booklet, entitled "For Beauty's Sake."

Price No. 1 Shower complete, with rubber or white duck curtain, \$15.00.

This set represents the "Standard" Portable Shower with curtain removed. Can be fitted and hung without it in position over the "with curtain" attached, and easily later converted to faucet.

## "Standard" PORCELAIN ENAMELED CLOSETS

**T**HAT the subject of sanitation and sanitary equipment is one that is constantly receiving the greatest possible attention at our hands, is clearly demonstrated by the constant improvements that are being made in fixtures which some time ago were considered perfect. Every new difficulty arising has been taken as an incentive to produce either improvements or new principles of construction that overcome the difficulties and provide satisfactory results.

The material of which "Standard" closets are made consists of a perfect amalgamation of porcelain enamel with specially prepared iron, effected in such a manner that the result is one constituent substance of equal elasticity, hard, smooth and non-absorbent, and without the tendency to craze or crack that exists where the thickness of the walls prevents an equable effect from sudden changes in temperature. It is well known that the effects of frost or low temperature, on closet bowls in particular, has usually been to craze the surface, and where the bowl has been left in very cold temperature while filled with water, in many instances, to crack the entire fixture, on account of the expansion of the ice in the trap.

The low tank combinations are conceded to be the most modern fixtures, as they have advantages over high tanks, due to their compact construction and different principle of operation, in that they can be installed under windows, stairways and similar places where there is not sufficient height for the high tank combination, and they lend themselves more readily to the artistic and economic arrangement of the bath room, particularly so where they are erected against the wainscoting or wall. They have the additional advantage of being more nearly noiseless, as by reducing the height from which the water falls in flushing the closet, the consequent noise is also proportionately lessened. This latter feature is a very desirable one, and in some instances an absolute necessity.

# **"Standard" CLOSET COMBINATION**

## The "Delecto"

PLATE 3113 R

**"Standard"** PORCE-  
LAIN ENAMELED "Delecto"  
Syphon Jet Bowl, Oval  
Saddle Seat and Panel Cover

18 x 36 in.	—	35.00	22 x 36 in.	37.50
22 x 42 in.			\$49.00	

If without drain board, deduct \$2.75

## "Standard" ENAMELED LAUNDRY TRAYS

Plate 605 R

**"Standard"** PORCELAIN ENAMELED Roll Rim Laundry Trays with Porcelain Enamelled Backs, Nickel-plated Union Strips, Wringer Holders (patent applied for), Nickel-plated Soap Cups, Waste Plug with Rubber Stopper and Nickel-plated Continuous Waste Pipe and Vented "S" Trap.

Complete as shown and described, per set of 3 Trays . . . . .	\$83.25
Complete as shown and described, per set of 2 Trays . . . . .	57.25
If without continuous Waste Pipe and Trap, for 3 port Trays, deduct . . . . .	10.25
If without continuous Waste Pipe and Trap, for 2 port Trays, deduct . . . . .	8.50

A well equipped laundry is just as essential to the happiness of the modern housewife as the bath room.

The above porcelain enamelled laundry trays are the acme of perfection and cleanliness.

One piece; no seams or joints.

They are as much superior to the stone, slate and other styles of wash tray as an enamelled bath tub is to the zinc or copper one.

Manufactured in numerous styles at various prices.

## HOW TO ORDER

### STANDARD BATHS AND PLUMBING GOODS

 AS we do not sell direct to the consumer, builder or contractor, but exclusively through dealers a few words explaining how to secure our goods will not be out of place.

If you have decided to use any of our fixtures, all that is necessary to do, in case you are building, is to instruct your architect to specify "**Standard**" goods, made by THE STANDARD SANITARY MANUFACTURING Co. The plumber who is successful in securing the contract for your plumbing will, without any difficulty whatever, be able to secure the same, as they are sold all over the world, and are carried in stock by dealers and plumbers generally.

Allow no substitution of other makes after you have once decided in your own mind what you want.

Our products can be recognized by the labels on the same, also by the marks on the packages. If you have doubts about the goods not being of our make, write us direct about the matter.

IMPORTANT NOTICE — When specifying or ordering any goods from this book, please mention design or plate number to avoid confusion and errors. We have many of the same designs shown in our catalogues under different plate numbers. All correspondence promptly and courteously answered.
